

### **Center for Innovation and Entrepreneurship (CIE) South Korea**

CIE South Korea is a national innovation ecosystem dedicated to advancing global innovation partnerships, enterprise expansion, and sustainable development through South Korea's technology, talent, and industrial strengths.

**Status: *CIE South Korea is currently in its foundational and strategic partnership engagement phase.***

## About CIE South Korea

The **Center for Innovation and Entrepreneurship (CIE) South Korea** is the South Korean chapter of **CIE Global**, established to coordinate and scale innovation, entrepreneurship, and global market-access initiatives originating from South Korea.

CIE South Korea focuses on **leveraging South Korea's advanced innovation capacity, industrial ecosystems, and skilled talent base** to support enterprise expansion, technology collaboration, and strategic partnerships across global markets, including emerging and growth economies.

Operating within CIE's global coordination framework, CIE South Korea serves as a **national coordination and partnership platform**, aligning Korean innovators, enterprises, institutions, and partners with structured international opportunities and impact-driven initiatives.

---

## What We Do

CIE South Korea operates as a **strategic coordination and enablement platform** connecting South Korea's innovation ecosystem to global opportunities.

Our core focus areas include:

- **Innovation & Enterprise Ecosystem Coordination**  
Aligning Korean innovation hubs, enterprises, and institutions within coherent national and global frameworks.
- **Global Programme & Initiative Design**  
Designing and coordinating initiatives that support international enterprise expansion, technology collaboration, and innovation deployment.

- **Strategic Partnerships & Institutional Collaboration**

Facilitating partnerships between Korean stakeholders and governments, enterprises, and institutions across target regions.

- **Enterprise Expansion & Market Access**

Supporting Korean startups, scale-ups, and established enterprises to access new markets and growth opportunities.

- **Talent, Skills & Knowledge Exchange**

Enabling talent mobility, skills collaboration, and institutional exchange programmes with global partners.

---

## **Programmes & Initiatives**

CIE South Korea operates through a structured hierarchy of **frameworks, initiatives, programmes, and projects**, aligned with CIE Global's architecture.

At the national and international levels, CIE South Korea coordinates:

- **Flagship Global and Bilateral Initiatives**
- **Strategic Enterprise Expansion and Innovation Programmes**
- **Country and Regional Partnership Initiatives**
- **Special and Thematic Innovation Initiatives**

*Detailed programme and initiative pages will be published progressively as each enters its implementation phase.*

---

## **Global & Country Partnerships**

CIE South Korea works closely with **CIE Global** and other country chapters to enable coordinated international engagement.

Key partnership focus areas include:

- Korea–Africa innovation and enterprise partnerships
- Korea–Europe and Korea–USA collaboration frameworks
- Bilateral and multilateral innovation and market-access initiatives

CIE South Korea serves as a **gateway for Korean innovation and enterprises** into structured global ecosystems, while also enabling inbound collaboration with international partners.

---

## **Partnerships & Collaboration**

CIE South Korea collaborates with:

- Government agencies and public institutions
- Innovation hubs, universities, and research institutions
- Corporations and private-sector enterprises
- Investors, development partners, and foundations
- Startup, scale-up, and entrepreneurial communities

Our partnership approach is:

- **Strategic and long-term**
- **Aligned with national innovation and industrial priorities**

- Structured through clear governance and coordination models
- Focused on sustainable economic and innovation impact

CIE South Korea welcomes partners interested in **co-developing, supporting, or participating in global innovation and enterprise initiatives.**

---

### **Phased Rollout & Implementation Approach**

CIE South Korea adopts a **phased and adaptive implementation approach**, aligned with CIE Global's coordination framework.

The approach begins with **ecosystem mapping, stakeholder engagement, and partnership alignment**, followed by the progressive activation of programmes and initiatives tailored to identified global opportunities.

Implementation is coordinated in collaboration with Korean institutions, enterprises, and international partners, with **digital platforms and programme tools deployed incrementally** as initiatives mature.

This approach ensures flexibility, coherence, and long-term sustainability while enabling measurable global impact.

---

### **Contact & Connect**

CIE South Korea welcomes strategic conversations and partnership inquiries.
